The Burpee-Quality in Seeds.

Advance Wholesale Prices for 1913.

For the Trade Only.

PHILADELPHIA, November 27, 1912.

You may get from other responsible growers seeds "*just as good*," but you cannot procure better nor can you get seeds *uniformly so good* for less money.

On our famous FORDHOOK FARMS in Pennsylvania, SUNNYBROOK FARM in New Jersey, and FLORADALE FARM, California, we conduct the most complete Trial Grounds. The number of field trials average seven thousand, while more than fourteen thousand soil tests for vitality are made also every year.

BURPEE'S SEEDS are grown either on our own farms or produced for us, of selected strains, in such sections of America and Europe as are best suited to the finest development of the various Vegetables, Flowers, and Grains.

At Wholesale—as well as at retail—we are "**A Mail-Order House**" *exclusively*. We never send out travelers to solicit orders. As a consequence, however, we are careful to attend promptly to inquiries by *mail or telegram*. In large lots on many varieties, this season, we are prepared to quote **special prices** upon request.

It pays to order early. Should any varieties be quoted lower in our general Trade List to be issued, as usual, January 1st, we shall give advantage of such reductions on all booked orders. Some prices are likely to advance,—thus you have everything to gain by placing your order early.

Terms of Credit.—To regular customers and houses of established credit, all bills bought from this catalog are due June 1st, without regard to date of purchase, excepting Beans, Corn and Peas, on which terms are (except when included in a general order) sixty days net or subject to a discount of one and a half per cent. for cash within ten days of date of invoice.

Bills purchased on special quotations, made by letter or telegram, are *net* sixty days from date of invoice, or subject to a discount of one and a half per cent. for cash within ten days of date of invoice. Unknown correspondents desiring credit are requested to give satisfactory reference in Philadelphia or New York.

Cash Discount.—We allow a discount of **Five Per Cent.** on orders (at printed prices) accompanied by a cash remittance, and also on all bills, except where Beans, Corn and Peas only are ordered (at catalog prices) paid within ten days from date of invoice.

The Prices quoted are those ruling at this date. We expect to adhere to these prices until the issue of our January catalog, except where important changes compel us to make advances or reductions, when we shall be governed by the market. **10 lbs. and more are supplied at the rates per 100 lbs.;** $\frac{1}{2}$ lb. and $\frac{1}{2}$ bushel at pound and bushel rates; but *smaller quantities will be charged at a slightly higher rate.*

NO CHARGE for Packing or Cartage.—Bags and boxes are charged *at Cost*. After delivering to forwarders in **good order** (as shown by Bill of Lading) our responsibility ceases.

Insurance will be effected only when so directed.

SEALED PACKAGES.—We make no charge for sealing **pounds, pecks or bushels**, but at the low bulk prices quoted we shall charge for putting up in smaller sealed packages, when so ordered, as follows:

In Ounces.—One cent per ounce, 50 cents per 100 ounces.

In Quarter-Pounds, Pints, and Quarts.—Two cents for each package.

In Two-Quarts and Four-Quarts.—A charge of three cents per package.

W. ATLEE BURPEE & CO., SEED GROWERS,
BURPEE BUILDINGS, PHILADELPHIA, U. S. A.

Cable Address, BURPEE, Philadelphia.

Seed Gardens and Trial Grounds at FORDHOOK FARMS, Bucks County, Pa.,
SUNNYBROOK FARM, New Jersey, and FLORADALE FARM in California.

Burpee's Vegetable Seeds.

TEN POUNDS OR MORE WILL BE CHARGED AT 100-POUND RATES.

 This list cancels all previous quotations. It is always advantageous to place your orders early, as sometimes disappointments occur through delay. Please use telegraph cipher ONLY for telegraphic or cable orders.

“Proved by Test.” Unless you should order some variety that we do not catalog and instruct that we get it for you (when we shall send it at your risk,—in its original package), you may be absolutely sure that you will receive from us only such stocks of strictly high-grade seeds as have been proved absolutely **“Best by Test.”**

Many seedsmen have much to say about tested seeds, but unfortunately with most dealers this applies only to blotter tests for vitality. Our tests for vitality are *soil* tests. While necessary that *seeds grow*, it is of prime importance that they shall be of choicest selected strains, such as can be relied upon to produce products **“true to type.”** This can be learned only by thorough field trials. No other seedsmen in America make so many or such complete trials as are conducted annually at our famous FORDHOOK, FLORADALE and SUNNYBROOK FARMS.

Choice Strains of Tall Sweet Peas,

Including all the desirable varieties—both new and old.

We are acknowledged as

Headquarters for Sweet Peas in America.

Not bound by these prices after December 31st, and only for quantities so far as accepted.

For cable words for quantities refer to our GENERAL WHOLESALE CATALOG or 5TH EDITION A. B. C. CODE,—but when convenient we prefer our own code.

As the trade now knows, Sweet Peas are in short supply the world over, and under the circumstances we are fortunate in being able to quote prices on practically all the leading varieties of both Spencer and Grandiflora types. The crops have all been subjected to approved inspection. Of the "Spencers" particularly, our Mr. Lonsdale, at Floradale, has taken special pride in the quality of the stock grown there.

America has never before "fallen down" on Sweet Peas as this year, and although we have harvested some good crops we know that before the planting season comes we shall be obliged to report "sold out" on many varieties.

Superb Sweet Peas of the "Spencer Type."

All of the Best Re-selected Strains.

	Telegraph Code	Per lb.
America Spencer. Red flakes on white ground; extra fine,	Slab	\$2 75
Arthur Green. A rich dark claret color,	Slabber	6 50

Nora Unwin. “The next best white to Burpee's White Spencer,”	<i>Garget</i>	1 75
Phyllis Unwin. A beautiful rich rose,	<i>Garrison</i>	60

An English Opinion of Burpee's Floradale Farm, Lompoc, California.

Mr. George Burt tells me that while he was in California he was taken over Messrs. W. Atlee Burpee and Co.'s great seed farms in the Floradale Valley. He says: “It was truly a wonderful sight to see the acres of Sweet Peas in full flower, and it was easy to compare the colours, growing as they were in big batches. Uncle Sam, a new one, is very similar to Mrs. Wilcox, but the flower stems were longer. Vermilion Brilliant impressed me very much, and it is quite distinct from Scarlet Monarch or King Edward Spencer. It is a very desirable colour of Spencer form and a strong grower. Stirling Stent was very promising, and being a dull day the colour was lovely. Florence Nightingale was growing strongly, but varied in type, and was not the clear lavender I expected to see. Gladys Burt, Mrs. Hugh Dickson, and Mrs. Routzahn were carefully compared as growing and bunched. The former was placed first by my friends, it being richer in the pink, more defined on the cream ground, and giving a longer stem than the others. A great demand is expected for this variety. King Edward Spencer and Maud Holmes as growing there were practically identical; bunched together there was no difference, but the former was the stronger grower. Gladys French was very beautiful and true, the huge patch giving a very pretty effect. Burpee's Mauve is a Pea of the future, but not fixed yet. Numberless varieties were on trial, and many promising seedlings were marked for further testing. The Peas on the whole were growing very strongly, and evidently the manager is the right man for the Lompoc Farm. I may say that the climate of California fixes the colours of flowers, and one does not see the varying shades in some varieties that are produced by climatic conditions in the old country.”—From “THE GARDENER,” London, England, December 23, 1911.

Best Grandiflora Tall Sweet Peas,

Including all desirable varieties—both new and old.

New Spencer Sweet Pea,—Charm

As the name implies, this novelty is a "charming" variety of delicate and exquisite color, such as we have every confidence in introducing to our friends. It was awarded a Certificate of Merit by the American Sweet Pea Society in 1911, under the name of "*Fordhook Fairy*," but to avoid confusing with our unique Primrose novelty for 1914, "*Floradale Fairy*,"—we have changed the name to "CHARM." The flowers are of fair size and most of the strong, stiff stems bear four flowers each. Of the finest Spencer type, they are throughout a glistening, pure snow-white, suffused equally through standard and wings with delicate flesh or blush-pink. It comes very true and is a most beautiful variety for bunching. *Sold only in sealed packets bearing our Registered Trade Mark.*

In sealed packets containing twenty seeds each: **Per pkt. 15 cts.; \$1.00 per dozen pkts.; \$7.00 per 100 pkts.** In lots of 500 packets or more, **\$6.25 per 100 pkts.** (Code word, CHARM.)

In sealed packets containing forty seeds each: **Per pkt. 25 cts.; \$2.00 per dozen pkts.; \$13.75 per 100 pkts.** In lots of 500 packets or more, **\$12.50 per 100 pkts.** (Code word, CHARMING.)

New Cosmos,— "Crimson Ray"

This distinct novelty originated from one plant which attracted marked attention, from the fact that the flowers, while equally as large in diameter, showed a *new departure* in form, number and shape of the petals. The petals were narrow and fluted, separated in star-like form and of the most brilliant crimson color overlaid with a velvet sheen. Of this plant, one blossom bearing twenty-two petals was marked for seed, and the selections from the products of this single flower have been continued each year since until now this many-petaled type has become so thoroughly fixed. The plants grow four to five feet in height, are most profuse in bloom, and the flowers are so striking and elegant that it will be acknowledged "one of the most artistic plants" of recent introduction. **Per pkt. 10 cts. WHOLESALE: \$1.00 per oz.; \$10.00 per lb.** (Code word, RAY.)

New Early-Flowering Single Perennial Chrysanthemums

This charming new type of the popular Chrysanthemum only requires to be seen to be grown by every one possessing a garden. They are not to be confused with the old double-flowered Pomponne varieties, being much lighter and, therefore, more graceful for house or other decoration; in fact, for cut-flower purposes they are unsurpassed. Immense quantities of their beautiful blooms can be cut from each plant the first season.

Plants are easily raised from seed sown indoors or in a hot-bed in spring and when set out in May will begin blooming in August, continuing until killing frosts (two or three degrees of frost does not affect them); or they may be lifted and potted for house decoration. The plants make symmetrical and bushy growth, attaining a height of from two to three and one-half feet, becoming literally one mass of beautiful single flowers of from two and one-half to four inches in diameter. The flowers embrace all the charming shades found in the double Japanese varieties and vary considerably in form, many of them being "stellata" or star-shaped.

The colors range from pure white, blush, light and deep yellow, pink, rose, orange, terra-cotta and old gold to crimson and purple shades, some having a distinct white disk around the yellow center. Excepting the Dahlia, there is no flower which gives such a wealth of bright blossoms during the dull fall days. They are true perennials, but should be given some protection during winter in the Northern States. Our seed has been carefully saved from our own magnificent strain at FORDHOOK FARMS. **Per pkt. 15 cts.**

WHOLESALE: Per 1/16 oz. \$1.00; 1/8 oz. \$1.75; 1/4 oz. \$3.25; per oz. \$12.00.

New Morning Glory,—Burpee's Airy-Fairy

This distinct novelty is the *earliest* and most *continuous-flowering* variety ever grown at FORDHOOK FARMS. The vines are of vigorous growth, quickly covering the trellis or poles against which they are planted. They begin to bloom very early in the season, and even during the brightest days the flowers remain fully expanded until afternoon. The flowering stems are gracefully disposed in front of the foliage, and the flowers are so beautifully placed as to have the appearance of their being poised or floating in the air. The flowers, borne in great profusion, are of an ivory-white of which the clearness is enhanced by contrast with the light rosy pink at the throat.

Per pkt. 10 cts.; per oz. 25 cts. WHOLESALE: Per oz. 15 cts.; per lb. \$1.50.

Dimorphotheca Aurantiaca Hybrida

NEW
HYBRIDS
OF
DIMORPHOTHECA.

New Selected Hybrids in Splendid Mixture

In habit, growth, and foliage, as well as height of plants (twelve to fifteen inches), and the size of the flowers (two and one-half to two and three-quarter inches across), these New Hybrids are like the parent *Dimorphotheca Aurantiaca*. They range in color from the purest white to red and bluish-white tints, sulphur, lemon, and bright golden yellow, golden orange, reddish yellow changing to light salmon-rose, superb shades of salmon, very light to deep orange-salmon. There are also varieties with different colored zones, such as white with a broad sulphur-yellow zone around the black disk, and soft salmon with a deep salmon-red inner circle. These zoned flowers are quite numerous and thus enhance the beauty and varied aspect of these remarkable New Hybrids. All our seed was produced at FLORADALE where the crop attracted the attention of all visitors. **Per oz. \$1.75; per lb. \$22.50.** (Code word, DIMHY.)

Dimorphotheca Aurantiaca The New "Golden-Orange" Daisy

This rare and extremely showy annual has become a great favorite everywhere on account of its very easy culture and most beautiful flowers, which are quite unique in color and immediately attract attention. The hardy plants, of neat branching habit, grow only twelve to fifteen inches high and are exceedingly profuse in flowering. Its Marguerite-like blossoms, two and one-half to two and three-quarter inches in diameter, are of a peculiarly rich glossy orange-gold. Its strikingly brilliant coloring is rendered even more conspicuous by the dark-colored disk surrounded by a black zone. **Per oz. 80 cts.; per lb. \$8.00.** (Code word, AURANTIACA.)

The New Ornamental "Rainbow Corn" Beautiful as a Dracæna,—as Easily Grown as Field Corn!

The stalks, including tassel, grow five to five and a half feet tall, and are clothed with many variously variegated leaves three inches wide and two feet long. The leaves (both on main stalks and suckers) are all superbly striped with broad bands of crimson, yellow, rose, white and bronze. The small hardy seed can be planted early, and as it does not ripen until very late the plants present their rich tropical beauty for a long season.

Rainbow Corn is the result of long continued painstaking care on the part of our friend, LUTHER BURBANK, who says of it: "Beautiful as the most beautiful *Dracænas*. This has been on exhibition by the California Development Board during the past season and has been the admiration of everybody. Nothing like it for decorative purposes, either for garden or for cutting." **Per lb. \$2.00.** (Code word, RAINBOW.)
